

Galactic History According to Lion and Bird People Races Interview

Jelaila Starr, Michael Salla

Galactic History According to Lion and Bird People Races Interview with Jelaila Starr

<https://rumble.com/v55bqmm> 93 minutes Jul 4, 2024

<https://www.youtube.com/watch?v=VuCEePliqGI>

In 1993, Jelaila Starr began communicating with a humanoid Lion-being called Devon who belongs to a Feline race that first established a presence in the Lyra constellation. She was told that the Felines were responsible for seeding the *first humans in the Lyra and Vega systems*, and later established a presence in the Syrian star system after a catastrophic war. The Felines have ever since acted as guides and mentors for human civilizations as they have colonized the Milky Way galaxy with both great success and failures due to ongoing conflicts with Reptilian races who were also seeded in our galaxy. According to Starr, the Reptilians were seeded by a Bird-like race of beings called the Carians. She asserts that the Reptilians are important mirrors for Earth humanity as we are collectively involved in historical conflicts that stretch back millennia. Both the Felines and Carians are members of a Nibiruan Council that acts as proxies for a mysterious group of Ancient Elders. In her first Exopolitics Today interview, Starr describes the extraordinary circumstances that led to her first communications with Devon in 1993 and the discovery that she was a Walk-In. She also discusses important elements from the work of Zecharia Sitchin regarding the Anunnaki and Nibiru. Jelaila Starr's Website: nibiruancouncil.com She has two books available on amazon:

[We are the Nibiruans, Return of the 12th Planet, Book One](#) 2013 \$6.99 211pp

[The Mission Remembered, Book Two](#) 2013 \$17.99 324pp

Unified Planetary Consciousness

Dr. Salla: Jelaila Starr had a life-changing Walk-In experience in 1992 when she learned about her extraterrestrial origins. Soon after her Walk-In, she began communicating with a mysterious Lion being named Devon, who telepathically contacted her. She next became a messenger for the Niberian Council involving highly-evolved Lion and Bird beings. She's written two books and a series of booklets and given many courses helping individuals learn about galactic history, healing traumas and reconnecting with their extraterrestrial origins. Well, welcome, Jelaila, to ExoPolitics Today.

Jelaila: Well, thank you very much. I'm glad to be here.

Dr. Salla: Well I'm very glad to have you here. I first learned about you way back around 2001-2002 when I got involved in this field and I read and I saw your book and I thought it was it was fascinating but this Walk-In, experience you had in 1992 seems to be the kind of like the transition point, the key point for understanding your story and information so why don't you walk us through what happened.

Jelaila: Well, there was about nine months of my life all going great. I was a single mom, but in a good relationship with my former husband, we all got long. It was just an amicable divorce. And I had a business that was doing really well and it was growing and life was good. My daughter was healthy and all of a sudden a series of events began to occur that over the next nine months just kind of took me to my knees. And I finally, after years, decided to get on my knees and pray and ask for help. And a couple of nights later, I had a dream. And in that dream was I now look back and realize that was the first contact from this being who did not appear as a Lion being in the beginning. That probably would have totally freaked me out. He appeared as a regular man, but still with the same brilliant blue eyes, fair skinned, but with dark hair. And he basically, as I explained in the book, I saw my soul walking down through this garden.

Like these two women came and they were floating above the ground, walking above the ground. And they were talking to each other and kind of giggling. And then one just very calmly came over and hooked

their arm through mine on this side and the other one on that side. And I felt my soul step out of my body and go with them down this long garden and then take a ride, go down these stone stairs and there was a reflecting pool there. And the last thing I remembered feeling or experiencing was the feel of the cool stone pavement on my bare feet. And then I turned around and I'm focused back where I was and there was this person standing in front of me just waiting for me to see them. And so that's kind of how it began.

Dr. Salla: So the Walk-In experience, how did you know that you actually had a Walk-In experience? I mean, can you explain? I mean, how does one realize that they've just walked into a new body?

Jelaila: Well, I went back and explained the next part of that dream in which he had merged into my body from head to toe. He walked around behind me and just basically pushed in. It was like I felt this pressure all the way along the top of my full body. And then I felt him push my tongue aside and begin to speak in a male voice through my mouth.

And the words coming out of my mouth were, "I will be speaking through you." And then he steps back out and comes back around to the front and looks at me, dead in the eyes and he says, "Are you okay?"

And at first I was mad. That did not work for me. And I said, "Yes, I'm fine." And I said, "What's your name?" And he said it, but then he was fading away. And it was like something like "Dev" or I could not make out what it was.

TYPES OF WALK-INS

So I just woke up from the dream at that point. And then it was months later, probably a year later that someone came into my office, a client, and she was all about Walk-Ins.

And I go, what's that? And so she said she was a Walk-In. I'm like going, okay.

And she explained it. And then about two days later, I was out in the woods because I was being sent out to the woods a lot. And that was all because of DNA activation stuff going on. And I asked, I said, "Am I

a Walk-In?" And the answer was very clear. "Yes."

Dr. Salla: Walk-In? You want to explain it?

Jelaila: Well, from my understanding, there's three different types of Walk-Ins. One is a *full soul exchange* where one soul leaves the body and another soul comes in. But that's usually, again, my understanding by contract, by soul contract. It's not by accident. And then there's another one called a, like a *twining*, a *two-soul*, a *soul braid*. And that's where the other soul will cohabit with the current soul, usually not always for a lifetime, but for a period of time. And then there's another one called a *stasis Walk-In*. And this is where a soul from, it's the consciousness of another being that projects while they're in stasis into a different person. And that soul can go back and forth when the one they're joining with is asleep. And that was what I understood was going on with me. It was a stasis Walk-In.

Dr. Salla: So you have this Walk-In experience, as I recall in our early conversation in 1992. And then in April of 1993, you have this experience with this being Devon that you later learned is a Lion being from the house of Avion, from the Lyra star system. So yes, tell us about the house of Avion.

HISTORIANS OF OUR RACE

Jelaila: Okay, from what he gave me and keep in mind that they only gave me a certain amount of galactic history, obviously. How many libraries would galactic history fill? If you talked about all of it, but they talked about the stuff that was pertinent to our planet and our time right now.

But the house of Avion originally started as a Feline race. And then the Felines eventually created child race, which many species always, they will not always, but they will create, when they develop a certain degree of technology, they can use genetics. They develop new species. And so they created a species that is known as the humans. And that's why we're so connected to the Feline and they originated to the first humans in the Lyra constellation.

The Feline, I think, came from another universe. They, or at least this group did. And so that's all part of how the universe is set up. There's multiple universes and souls can evolve. And they achieve mastery in

a particular universe and they reach a certain level of consciousness that they can then go on and create another universe and start what we call a new evolutionary plan or game for souls to evolve in the next universe.

And so that's why we believe that the soul is immortal. It never dies. So it's always going to want to create. So it's always moving from one universe to another achieving more and more, learning more and more, growing more and more. So they came from another universe. They never told me which one. But in this universe, they were in the Lyra constellation as a Feline race that eventually created a human race.

Dr. Salla: Now, I mean, that's very interesting because I've heard so often that many contactees cite the Lyra star system as the birthplace of humanity. I mean, Alex Collier and many others have said something along those lines. So the information you got was that there was a Feline race there first before the human presence and that the Feline's now I'm guessing and maybe you can correct me that they may be genetically altered or tinkered with some primitive hominid species in the Lyra system to create what we would now consider to be the *first humans*.

Jelaila: That's very possible. They did not elaborate that much on themselves. Typical of the Feline that I have worked with, they focus more on the history and what your job is than on who they are.

Dr. Salla: Okay. So they are a very interesting race. Now you have cited or referred to Zacharia Sitchin's books on galactic history as very important. Why is his work important and how does that kind of relate to Lion beings and the creation of humans?

Jelaila: Okay. So that's a good question. Zacharia Sitchin's material does talk mostly about the Nibiruans, when they came to earth and the records that they left behind. So I was guided to his first book, *The Twelfth Planet*, about 1995 and that was around the time that they began to show, tell me who they really were versus just some master teacher that if I pay attention I would become more than I ever thought possible. That was his words.

And so when they began to explain to me the whole galactic thing, the first step was to send me to a bookstore where I was going quite often

and I was cruising the shelves just looking for whatever I was supposed to read next and that book literally fell off the shelf and hit my foot. And when I picked it up and I looked at it, fortunately it was a paperback. And I just opened up randomly to a page and the word that jumped out was Nibiru. And so I knew that was what I was supposed to read.

And from their perspective, that is a fairly accurate, not 100% accurate, but a fairly accurate explanation of the people who came to earth, who created humanity here. And on their planet, there are those that are still Feline. Although there's multiple hybrid races on Nibiru, it's not just one species from what they're telling me. So they want to know the history from Sitchin's first books.

Dr. Salla: So Zacharia Sitchin, he talked about Nibiru as being this kind of like red dwarf planet that was stuck in this kind of 3,600 year loop around or cycle or orbit around the earth. Others have talked about Nibiru as being a kind of planetoid that is under intelligent control by extraterrestrials. So what is Nibiru? What were you told about it? Is it a rogue planet, red dwarf? Is it a planetoid under intelligent control?

Jelaila: What is it? Yes. When they first told me about it, they said it's a spaceship, it's a battle star. It's a planet, spaceship, planet, battle star. And of course how are you going to make sense of that? So but years down the road, as I began doing the work that I was assigned to do, and they began to give me more pieces of the history. It all became clear that Nibiru is actually part of a solar system. It is the twin of our solar system.

There's a lot of binary star systems out there in the galaxy and in the universe. And we are a binary star system. And this is the sister star, the dark star to our star. And it's dark because it was a star that never ignited. So it is basically a sun that never ignited. So it would show up as a red dwarf. But it still has a magnetic core and it still has planets and matter that have formed around it. And the planets they circle that sun on ring nodes, just like our planet circle, our sun on ring nodes. But they have a lot more of them that go further out. They also have a lot of space dust, if you will, a lot of asteroids and things that have been pulled into its gravitational field. So Nibiru, the planet spoken of, I

believe is a *fifth planet* from the, the actual red dwarf.

Dr. Salla: I see. So as a planet around that red dwarf, also spaceship, battle star, can it actually leave the orbit of that red dwarf and kind of like under its own devices, come into our solar system to check things out?

Jelaila: Well, that's an excellent question again. Nibiru is the planet. They have spaceships. They also have battle stars. There are a lot of battle stars. So it's a planet with its own military, with its own Starfleet and with asteroids that have been hollowed out and turned into battle stars. So they've got all of that. So yes, those things can come and travel around. But never the planet. My understanding is it stays within its own orbit.

Dr. Salla: Okay. So with Nibiru, the star or the red dwarf, it stays in this orbit, creating a kind of dual star system, like our solar system actually has two stars, the sun and this red dwarf out there, I guess presumably out in the Oort cloud pretty far away and it just stays in that very vast orbit. But occasionally battle stars or ships will come from that red dwarf or the planets orbiting that red dwarf into our solar system for whatever purpose.

Jelaila: Yes, but remember that that solar system, it moves. So we connect every 3600 years. So we're spinning one way and they're moving the other way. So when the planet comes through, the red dwarf comes through, okay, and it's called Nibiru because it's from a Nibiru is a solar system. And when the red dwarf comes through, it comes through in the opposite direction of us. That's why we've had cataclysmic situations where it's core, it's magnetic core would flip us on our poles. If we were on the same side of our sun as it was, if we could see it, we were in trouble. If we could not see it, we were going to have a blessing. They would pass and we would feel virtually nothing.

CATASTROPHIC EVENTS

Dr. Salla: Now, you wrote the book, *We Are the Nibiruans* in 1996. So, and that went into more detail into all of this information. And as I recall this 3,600 years cycle, it could be experienced differently depending on the level of consciousness. That if our vibration

increases sufficiently, then it's not going to be a kind of devastating, solar wide catastrophic series of events. As Sitchin described, it can be much more gentle and mitigated depending on our frequency. So you want to elaborate on that?

Jelaila: Yes. From what I understand is that we attract into our reality whatever we focus on. And so, if we have raised our consciousness, we're no longer in the same degree of fear as we would have been before. So frequency is everything, right? And going back to the idea of, you attract what you think of, look at people who are in a tornado. Say you have a whole town and all but maybe three or four of the homes are destroyed. But why did those people still survive when the others didn't? Maybe they didn't need that experience.

So from a spiritual perspective, we only pull into our reality what we need for our own experience. So if we don't need that experience, we don't have it. So if our planet is making its jumps, if the people on the planet are making their jumps, they do not need catastrophic destruction. So they won't get one.

Dr. Salla: That's very important right there. I think what that point you're making, that our frequency as a planet is going to determine these kind of extra solar events or these kind of system, solar system wide events.

And I think that's actually a very important point to make. Now you, in the, *We are the Nibiruans* the book, present the information in those terms that you have these Nibiruans comprising Feline beings and others who are here to kind of teach us, enlighten us so that we can raise our frequency so that we don't attract these destructive events. So yes, can you maybe elaborate on who or what are the races on the Nibiruan Starship, planet, planetoid, whatever you want to call it.

Jelaila: Okay, well, first of all, the group that contacted me were not the 5D ones that are on the planet now. They use the name Nibiru because they wanted me to understand that they are the ancient elders of these Nibiruans and the Nibiruans were the parent race of us humans on earth. They came here and created the human race. That's their understanding. So they are a mixture from, I mean, these are, they call themselves the ancient elders. They are human. They are Feline. They are Reptilian. They are Bird people. They are all

mixtures of races in this ancient elders because these are not just humans and Carians and Feline's. They are many different races from other universes that have also come here to participate in this universe. So they're just a mixture. Now on the Nibiru that we speak of, the one known in the ancient Sumerian text, they are also a mixture of races and species. There isn't just one. There are some Feline's. There are some humans. There are some dragons. There are Bird people. There are cetaceans. There are Insectilians. I mean, the list just goes on and on. So it's basically a melting pot just like America is a melting pot of all these different, instead of it just being one species, it's like on this earth. It is a plethora of species on Nibiru.

Dr. Salla: Can you tell us a little bit about the Sirius star system and how that relates to Nibiru and the different beings from there? I remember Zecharia Sitchin kind of like bringing in Sirius and it was like, how does that relate to the whole Nibiruan or the Anunnaki and the Lion beings as well? Yes, because I know there's a Sirian connection to the Lion beings. So can you tell us about that?

Jelaila: Okay, so my understanding is that Nibiru, the planet, was originally in the Sirius star system and by a catastrophic event that I wrote about. It was blown out of the Sirius star system when, and then there was another planet that was completely obliterated during that catastrophe and it damaged the sun, the Sirius B sun.

The Felines, there's a group of Felines that are in Sirius A. There's a group of dolphin people that are in Sirius C and then there was human colonies from Lira on Sirius B. And so the Felines that I have talked to, like one that I wrote that gave me information that was the DNA recoding process, which is explained in the third part of *We are the Nibiruans*, came from a Feline geneticist from Sirius A.

He has an amazing sense of humor. He's very intelligent and I just, I find that the Felines are some of my favorite species, maybe it's because I'm so connected to them, but they're great historians. They work a lot with crystals. That's one of the things in fact when I first started my actual training under them, one of the first things they did was have me go get cats. I went and had got five cats and I went and got a whole bunch of crystals to set up a crystal grid because they said the crystals, the grid would amplify the energy in my home and

then the cats acted as transmitters that would increase my ability to understand the communications going back and forth.

Dr. Salla: Now these alien beings from the Sirius star system and that is truly fascinating and very personal in a way for me. I did a star lines course with the Monroe Institute and they kind of teach out of body experiences and train you to be able to project your consciousness. And as part of one of their, their courses, I actually projected my consciousness to the Sirius A star system.

And as I was having my consciousness there, I saw a Lion being a white Lion being into my just pop into my mind. And I went back later on to do a second exercise because I felt that was like something I had to explore. There was a Lion being there and I communicated with me and all it said was three words was *Unified Planetary Consciousness*. And that was really striking for me because that was like, that summed up what I felt was like a life mission. So yes, can you elaborate on what these Lion beings, these Felines have to do with unified planetary consciousness?

Jelaila: Well, that's the whole purpose of having us down here doing these missions is from the perspective of galactic history, we have destroyed four home worlds. Two of them were what they call grand experiments.

The grand experiments occur when there's enough species with or enough being souls within a universe to begin to pull off what they call an integration, integration of light and dark and all of its forms. So there's usually different species that have opposite belief systems, prime directives, and then they will end up. And so we will incarnate into those species to play out different roles. Over an eons of time and then we will get to a point where if enough of us have achieved a certain level of integration, we can choose a planet and these souls will all come together and they will play out a plan, a blueprint for the planet.

And hopefully at the end, they will be able to integrate. They will be able to come from wherever they are in their opposite beliefs and with all their emotional baggage from all the trauma they've gone through and come to a place of peace at the end.

And so this is the third time that we've tried this. So everything they

did, all their history that they gave me was about this process in this particular universal, what they call the grand universal soul game of evolution.

Dr. Salla: So is this kind of like a polarity game? Like you have people perceiving dark and light and there's battles between the two, but ultimately finding a way to reconcile or integrate these different perspectives and the different beings, whether they're Reptilian, human, and so forth. That really the goal of the game is you find some harmony, some balance and that's how you achieve a *Unified Planetary Consciousness*.

POLARITY INTEGRATION GAME

Jelaila: Yes, it's like all the animals in the farm yard have to learn to get along. The horse, the cow, the chicken, the pig, the fox, the coyote that comes in, tries to eat them, they all have to learn to get along. The Lion has to lay down with the lamb, that whole thing. That is what we're trying to achieve. And in this history, for this planet, you've got the Reptilians and the humans. And they must learn how to get along, even though they have totally different prime directives. They have to learn to get along, not wipe each other out, not send each other off planet, but they have to learn to live on this planet in harmony. If not, then this planet will go nuclear just like the others did.

Dr. Salla: Yes, that's very important because I know when it comes to Reptilians, our people often depict them. I mean, the David Icke information depicts Reptilians, these shape-shifting beings that are kind of like evil, manipulative, control humanity. But there's a kind of other aspect to them.

Others have talked about this, and I think you've talked about that there are positive Reptilians as well that are here to help and believe in righteousness and ethics and so forth.

So it really is, I guess, a matter of like being able to see that Reptilians are kind of like a mirror for us. And if we see darkness, then they're going to be magnificent warriors for us to go to war with. If we're seeking wisdom, they're going to be magnificent teachers and healers to help us elevate our consciousness. Is that the way the polarity

game works?

Jelaila: Yes, in fact, some of my most profound teachers in the ancient elders were Reptilian, very beautiful beings with very highly developed consciousness. That's just the meat suit that they were wearing. It's just like the Feline is still a soul inside that body. It doesn't matter what form they're taking, they're still a soul. That's just happens to be the side or the physical form that they chose for that incarnation. So you have to look beyond the exterior and look at the soul inside. And these are highly developed souls on that nine-dimensional group.

Dr. Salla: That's very important. So that means that some of us in these human avatar bodies may have had earlier lives as Reptilians, whether on earth, in an underground civilization or an off planet. And vice versa, Reptilians could have had lives. And part of the soul evolution or growth is to be able to recognize that, oh, okay, that being I recognize from another life or another system.

Jelaila: Yes, I mean, just like it's to label all Reptilians as bad would be like labeling all humans as bad. Does that make sense?

Dr. Salla: Right. Yes, totally.

Jelaila: No, there are humans that are anti-human and there are Reptilians that are anti-Reptilian. I mean, how many people have I met that say "I hate all humans".

Dr. Salla: Right. Yes.

Jelaila: Okay, we're going to where do we start here?

Dr. Salla: Yes, I think I can't remember if that was you that the polarity integration game, but that's the name. Perceiving these differences and finding a way of uniting them that that really is very important. So you want to talk about that a little more?

Jelaila: The polarity integration game. Yes. Okay. So that is my understanding based on what they explain to me is that that is like a name for the universal plan for this universe because every universe that is inhabited and I understand that's them all, they usually have a system in place for the souls to evolve within that universe up to whatever level that universe is set up to go up to. So it's like going through school. All right. You don't have just one grade. You have multiple grades. So this is their plan to graduate souls out of that universe. And in our universe, the game is polarity integration. It could

be different in a different universe, but here it is the integration of two polar opposites coming back together and learning how to respect each other's differences. It's like they learn how to dance together like a man and a woman. The woman makes one step. A man makes another, but they learn how to work in harmony. They man doesn't have to become the woman. The woman doesn't have to become the man. They don't have to become a hybrid of the two. They can remain distinct and individual. And that is the plan.

Dr. Salla: Now people have spoken about the different beings in the Anunnaki in terms of their role in establishing the human presence or creating genetic experiments on earth. Enki is typically associated as the geneticist, the scientist who helped genetically engineer humanity with Nin-Hur-Sag. And Enlil is depicted as the space commander, sometimes associated with beings like Yahweh that could be quite ruthless. So yes, what was your information about Enki and Enlil, the creation of humanity, and the whole kind of Yahweh religious thing?

Jelaila: Okay, well I see them both as having very distinct roles to play. And I understand some of the interactions. They're like between two brothers they're going to do some things that they go behind each other's back, just like two brothers do. But Enlil's job was to run the outpost. This was an outpost of the Nibiruans. And it was set up because there was gold found here and their planet was dying from radiation. And they needed gold to put into their atmosphere to save their people because they had famine, they had disease, all this because of this radiation from space after the last galactic war.

So Enlil's job was to make certain that everything ran smoothly and he had to report back to his dad, who was the king of Nibiru, that okay, everything is going okay, we've got shipments coming don't worry we're going to make it, we're going to make it, we're going to save the planet. Enki on the other hand, because he was the son of a concubine, still a queen, but it was a Reptilian queen. So he was he was half Reptilian, half human. And being a master geneticist, he liked to play in his laboratory. And his laboratory was in the Abzu, which was basically in the area of Ethiopia. And that's where a lot of the gold was being mined in that area.

So he created the humans in a response and as a solution to the

problem of the astronauts who were mining and believe they came from a place where first of all, they're much taller, they do not have the heat that we have on our planet, they could not handle the heat in the mine. And these were highly, highly educated trained specialists.

These were physicists, these were scientists, these were top engineers mining gold, because it was all hands-on deck to try to get this gold out of the ground and get it back to Nibiru.

So Enki, being a geneticist, he went in and he created the humans, the first humans. And at that time they were hybrid, so they couldn't procreate.

So eventually what he did was he went behind Enlil's back because the agreement was that the humans would be created, they would finish mining the gold, and then they would leave the species alone and let it develop on its own.

And they would come back because once you create a species, you must parent that species up to a point where they can evolve to a certain level of consciousness. And so you don't just abandon them, you stay connected to them, but you come back every so often do a DNA upgrade. And that's what they've done.

And so he went, so the first problem that they had was that Enki wasn't supposed to allow them to procreate. He was supposed to only create a certain amount of them, and they used a lot of the nurses, which became the birthing goddesses in later times. The birthing goddesses were the nurses, but it was hard on the nurses to keep being pregnant over and over through in vitro fertilization to create all these babies. And then they became attached to the babies, and they didn't want the babies to go into the mines and all that stuff. So Enki said, well, I'll just go ahead and I'll upgrade them so that they can procreate.

But he did that against without telling Enlil first. So now that puts Enlil in a bad situation because that was not supposed to be part of the plan. So that was their first run-in with each other. So now the birthing goddesses can go back to just being the nurses, and now the humans can procreate, and that was the whole story of the Garden of Eden, which we can't get into right now, but we can do it as part of the history.

And so Enlil's job was to keep everything running and on schedule. Enki's job, was to take care of the medical needs of the astronauts, and at the same time help run the hospital there. And of course, that was Nin-Hur-Sag's job. She was the chief medical officer. And they just went about things differently.

And so I didn't see that either one was a bad guy or a good guy. They were just trying to accomplish a job, trying to accomplish a mission to save their planet. And as you know, things can always, monkeys get thrown in there, literally no pun intended, but it just that's how things went. And that's how the story came down. But it came down in a somewhat altered fashion to make one guy look bad and one guy look good.

Dr. Salla: Now I'm just kind of curious about this Enki having a Reptilian mother and Enlil having a humanoid mother that Anu was the father of both of them, because I've heard the opposite. I've heard from other sources the opposite. And I'm wondering, because you like in the ancient texts, the story of a dooper and so forth, that Enki was giving his genetics and blending it with the early hominid to create the, to create a dooper and the first humans. So to me, wouldn't he be the one with the human mother, because he was creating the first human being that was the prototype for others like a dooper and all that followed and Enlil having the Reptilian. So I just wanted you to reflect or comment on that.

Jelaila: Well, that's an excellent question. Okay. So this is my understanding. All right. There was on Nibiru, just like on Earth, they do alliance marriages. And there were, there were alliances with Dragon groups within Orion and other constellations, other star systems. But there was a queen that was an alliance marriage. She was a lesser queen, a Dragon queen that was alliance marriage with Anu. And so their first born was Enki. And so the big issue between Anu and between Enki and Enlil was over first born or first seed, because when Anu came to power, it was still first born rules, it becomes the heir.

And so Enki was the first born, but then Enki had a baby. And she was half sister to Anu. So that went to precedence because it was first born. So before Enki, it was first born. Yes, just so, wait a minute, let

me back up.

It gets confusing. So Enlil was the first seed. He was the first seed of Anu and Enki who were half brother and sister. So they changed the succession rules so that the first seed, which was more human, could succeed to the throne. So that was Enlil. Enki did not care. He did not want to rule. He just wanted to hang out, drink beer. Yes, he, he loved to drink his alcohol and hang out in his laboratory. He was not interested in ruling at all. He was more than happy to let Enlil do that. The only problem was, is that if he wanted to do something, he didn't want to go ask his brother for permission. So that was their conflict. So Anu, so there were hybrid mixtures on Nibiru of human and Reptilian, there was Feline and Reptilian. There's all kinds, just like on the earth today, you have part Asian, part Caucasian, part Native American, part Caucasian, part Black, part Asian, there's all kinds of mixtures where there's all kinds of mixtures there, except there are different species of mixtures, not just colors. Does that make sense?

PRIME DIRECTIVES

Dr. Salla: Yes. Okay. So now in terms of the Reptilians as a particular race and humans as a particular race, in your first book, *We Are the Nibiruans*, you, you talked about the *Feline* as kind of like being, the founder race or like the protectors and guardians of the human experiments and of the *Carians* or the Bird people being the progenitors or the founders of the Reptilian race. So, would you explain this kind of heritage or the difference between these Feline and these Carians in creating different races that would be involved in conflict.

Jelaila: Yes. And that's really where we should start the galactic history is right there. So my understanding is there were two primary races. There was the carrion, the Bird people, and the Feline's. And as most races will, they will create a child race down the road at some point. So the *Carians created the dragons* and the *Feline's created the humans*. The humans are the youngest of the four. So the Carians and the Feline's and the humans and the Reptilians. *The Reptilian carrion group had one prime directive*, their reason for

existence, if you will. And then the Feline's and the humans were given a different one. So the Felines were told, wherever you go in the universe, wherever you explore, if you meet another species, your job is to learn how to live in harmony with them. You don't eliminate them. You just learn to live in harmony with them.

The Carians and the Reptilians, theirs was that wherever that your job is to *maintain the biosphere of the planets*, to maintain all matter. So if anything should happen to a planet, you're responsible. If it gets blown up, you're responsible because you didn't do your job. So you have one that maintains relationships and one that maintains the planets on which these souls are incarnating. So normally, so you would have a police force. And then you would have the people who would make certain everybody was getting along, right?

As long as both sides understood that and did their job, they'd be all right. Now another thing that went that was given to the police force was that if you were, if you come across a species on a planet, you have some choices about how you handle that species. If they are not affecting the planet in a negative way, you can leave them alone and you should leave them alone. But if they are in any way, parasitic to the planet, hurting the planet, which would threaten the planet's life, then you can either enslave them, or you can eliminate them. That's your choice.

Dr. Salla: Well, that gives another perspective on why humanity has had this kind of very complex history with the Reptilians. People will point to that and say, well, the Reptilians are evil, manipulative, David Icke, for example, many others. But on the other hand, you could point out to what you're saying that humanity, we're kind of like a, we're like a virus, we're out of control, we're overbreeding, depleting the environment, killing other species, and kind of like just totally out of control. And so, in a way, there's this conflict. And just as you've said, that there needs to be a balance that's found here. So how far away are we from finding that balance?

Jelaila: Well, my understanding is, and I was told this back in, I think, 2018, maybe right after we finished, we started my second mission here, was that we are going to make it by the skin of our teeth and a bit more. So we're close to the end.

Dr. Salla: Okay, so there's, there's eight billion of us on the planet. And of course, I mean, the oceans are being ravaged. I mean, there's so many environmental problems being caused. So, what is going to be the solution here? I mean, is it going to be exporting all this excess population into the stars and colonizing other worlds? Is that the way it's going to happen?

Jelaila: Well, okay, so all of how you look at the population, this planet is far, in a way, capable of handling more than eight billion people. Because you look at the amount of space that the humans actually take up, it's not, it's not near all the planet. So we don't see that the population is a problem.

The second is that there is technology to clean up the oceans. There's technology available to clean up the air. It just hasn't been released yet. People can say, well they've hidden it from us. Well we have to take back this planet, because the Reptilians were going to take it over. We had already shown them that we were like irresponsible teenagers as a race.

And from a galactic perspective, we are young. We are much younger than most of the races. And so we have something that is very unpredictable.

See, the thing about the Reptilians is that they don't change. They are solid as they can be. And so, for them to make a change, it takes millions of years for them to make a change. And that's why they are the most prolific and the one of the most powerful species in the universe is because you cannot assimilate a Reptilian.

They're like rocks. You can't assimilate a rock. You can crush it, but you can't assimilate it.

Whereas the humans were very malleable. We can be easily assimilated. We can be easily duped. And what is it about us that makes us that way? We have this thing called emotions. And until we learn how to control our emotions and balance our emotions with our logic, we can be unpredictable. And when we're unpredictable, we can do things very destructive. So we have to step up to the plate and become adults from a species perspective. We have to graduate from teenager to adult and learn how to handle things. Even though we get upset, we don't react in anger and we don't just immediately annihilate

something.

That is the plan and we are learning how to do that. We're getting it right this time. They will not be able to take over our planet because we have earned our right to this planet. In the meantime, they're holding the power, which by the way, we gave them.

HUMANS AS GOLDEN CHILDREN

Dr. Salla: Okay, and so that is fascinating. Now, you have identified that humanity has this incredible potential, malleability to be very flexible in terms of mission and consciousness. So you've talked about humanity's divine purpose becoming galactic peacemakers. And I know Alex Collier has talked about the path that the Andromeda talk about something very similar. So is that really what we can become as a species if we go down this path of polarity integration?

Jelaila: Yes, we can, because we have something special. The way that the Nibiruans explained it to me, the ancient elders, *we are the golden children*.

We have all the library of DNA codes. We are the ultimate creation. We have both logic and we have emotion. We have, I think, it's 64,000 neurotransmitters in our sensory neurons in our heart, in our high heart, that enable us to interface with the morphogenetic field around us. And that's how we create reality. The Reptilians don't have that. They don't have the level of emotion. They have like black, white and gray. And we have the colors of the rainbow.

So we have not only the black, white and gray, we have all those colors. We can create whatever we want, because we have this amazing inner technology that they do not have. They have to use propaganda to program us to create what they want us to create. Think about that.

So this is all been proven through quantum medicine, we have this amazing ability. So we are able, if we can achieve adulthood, through all that's going on right now, and this has all been part of the plan to help us graduate to an adult level, where we can take back our planet without destroying it and learn how to get along without wiping out the other side, but just taking them out of power.

That's all we need to do is take them out of power and get them to stop eating our kids. That would be nice. Oh, I wasn't supposed to say that. Then we win, and they win, because they don't have to face potential annihilation, because they failed their prime directive of protecting the planet.

Now, there's all this other stuff going on about how evil and all that that they are. Yes, but you could say that about humans, like how we treat animals. I mean, seriously. So we're pointing fingers at them, and yet we're doing some of the same things to other species that they are doing with us.

So we have to grow up and take responsibility and learn how to get along, how to see the other side and we'll have a great..., we'll have the most amazing world.

That does not mean that they're going to be totally eliminated. It just means that they won't be able to do the harmful things that they were doing. And we on our side are going to have to clean up our act as well.

Dr. Salla: Now, I know with your first book, when that came out in 1996, and then you had a second book coming out, *The Mission Remembered*, I don't recall the year, but that was a part of your kind of first mission or your first kind of effort to see the planetary consciousness with this awareness of galactic history.

And then you said that you kind of like withdrew from the scene. And only now you feel that maybe it's time to come back. But what was it about the mission remembered? And what was the timeline going to be like that was changed because you think humanity kind of like got the essence of the mission?

Jelaila: Okay. *Mission Remembered* was written at the very beginning of my first mission, which was around the end of 1996. After I'd come out of training and was ready to launch my first assignment, they call it, for starseeds, because you're also a starseed, you can be a Walk-In and a starseed at the same time.

You go through basic training, intermediate, and then you go into pre-launch and then you launch, your mission starts. And so the first one was written at the beginning, and I had only a skeletal overview of the history at that point.

So when *Mission Remembered* was written, it was written at the end of that first mission in 2007. The mission ended in late 2006, but it took me a while to write that book. And it fleshed out all the galactic history because we had done all the work.

So what I was sent to do, and there are other people on this planet besides me, but we came early enough in the timeline to seed what we call templates or blueprints for an event that would come in the future, so that when it occurred, there would be the ability to look at it from a different perspective, a more integrated perspective and respond to it in a more integrated, compassionate way than we had in the past.

On these other earlier planets we destroyed our planet. So the ancient elders, they call themselves time healers. It's what they do is they, when a planet gets destroyed, what happens to all the souls that incarnated there?

They can't just end up in limbo. So what they will do is they will weave the timelines into another planet so that those souls can migrate to that planet to continue incarnating and continue their evolution. So they migrated. They wove the timelines from the planet in the Lyra system that was destroyed, the planet in the Pleiadian system, Avion 2 that was destroyed, and then Maldec and the one in Sirius B, all into Earth.

So all those timelines are playing out here and they're playing out in our current timeline. So at the beginning, the timeline of my mission in 1996, the timeline would need to be changed by 2012. So we had to lay foundation templates for events that would happen many decades later, which we now see three decades later, because now they're actually happening now.

But we laid the foundation templates in the first mission and then in the second mission, we tweaked those and added to them. And there was a 10-year period in between where I was just supporting what was made, doing my own inner work and watching everything unfold. And then when we started again in June of 2017. June 14, 2017 is when the second mission began. Obviously a lot of change had occurred, but it had occurred in the right way. We got through 2012 correctly. We shifted into a different timeline at that point because the

consciousness had been raised.

It started with harmonic convergence and kept going. And then we realized that all the templates we had created, the foundation, were still working. And we had to do some tweaking. And then in 2017, we needed a new set to overlay those for the events as they would play out now versus the way they would have played out before.

Like there would have been an, I can't say that word, right? There has been the demise of a leader in the old timeline. And this timeline, there might be an attempt, but it would not take this person out.

EARTH CHANGES

Dr. Salla: So as I kind of understand it then, the early predictions by people like Edgar Cayce, Gordon Michael Scallion that there would be tremendous earth changes, flooding of New York and Florida and so forth, that those, all those predictions, they didn't turn out because humanity had sufficiently incorporated these teachings, these lessons. You mentioned the harmonic convergence. And so by 2007, there wasn't, there, these changes, that timeline had been averted. And so from 2007 to 2017, this was kind of like a quiet period for you, because I don't remember you kind of like doing very much at all in that period. And now recently you've come forward again because the, we are on a timeline where these kinds of destructive events could happen if we don't make the right choices as a species.

Jelaila: Well, that's, that's very close. The foundation work was done on catastrophic events, geopolitical or geophysical catastrophic events that were from past timelines, human home worlds, let's put it that way.

These events occurred on human home worlds and so they were woven into these current timelines so that the souls could have a chance to replay the events and this time make a different choice. That's what all the templates, seeding the mass consciousness grid with a different way to resolve or deal with an event or series of decisions that had to be made that could have led to that event was our work.

The dark hats seed the mass consciousness grid. They know how to

do it. We also know how to do it. We just use different things. They use hurting people using fear. We use compassion. We use seeing the other side and understanding our role in co-creating an event and choosing to do it differently now than acting as a victim of somebody else.

That's the most simplistic way that I can say it. And so that period of templates. all they did was avert the worst case scenario. So when we completed 2012, at the end of 2012, we had moved off of that old timeline. So now it didn't mean that the events wouldn't occur. It meant that we would minimize them.

We would downgrade them. So say a hundred-foot tsunami, wall of water would be downgraded to five or ten. So we'd do a little bit of damage, but not a lot. The inundation of Florida might lose some coastline, maybe a foot, maybe two feet, but you wouldn't lose it all. You wouldn't be visiting Florida in a glass bottom boat. So that was a difference. So 2007 to 2017 was just maintaining everything that was already in place. And like I said, seeing how things turned out.

Then you go into the next phase and you go, okay, we're going to need to add here, because these events are going to happen and these events are going to happen, which are still all part of the timeline, but they come later in the timeline and they can be added to what's already there.

You create new templates for those always seeding the mass consciousness grid because we all download from the grid. We're like bumper cars in a carnival. It's all they're all hooked to these wires up above and we're all running around. You disconnect those wires and we don't go anywhere. Well, so we're seeding that electrical grid up there that we all download from consciously and unconsciously. And that's what the templates do.

Dr. Salla: Okay, so right now we're going to cover some very controversial subjects with Jelaila Starr and this might invite some censorship. So, Jelaila Starr, I know you have some information about the events that are going to be happening now. So why don't you start off with this kind of assassination of the US president and this kind of like June 2017 and this new template?

Jelaila: Okay, so I usually get my assignments. I start to get ideas of

what the assignments are going to be or just little insights, downloads, usually early in the morning. And so in late night 2016, I started getting this idea about we're going to go back to work, but I didn't know what it was going to be. But over the course of the next few months into the spring, I got the idea that yes, we are going to be starting a new assignment. And it was four events that are going to come in the future. So we began June 17th, or June 14th and 2017. And one of the first things that we got, and this is the way they work.

They will download some information and then we will need to look at that information from both sides and respond to it in a different way. And that creates like a blueprint for other people to do the same. And of course, everything that we think and we do is recorded in the record or the Akashic records or the mass consciousness grid, it's basically I understand the same thing. So you're always uploading into the grid every day. That's why when you when you pass over, you do a life review, it's everything you've ever thought and done is right there. It's they're playing back your file. So the blood in the streets and the assassination, we were told in late July, early August that there'd be an assassination attempt on the leader. And this was a repeat. So they always refer back to the galactic history they gave me.

This is a repeat of this timeline from this planet. And that was on our second big human home world in the Pleiadian system, which I understood was the name was something like Avion, dispelling maybe off. I don't know. They don't tend to get too hung up on that kind of thing. They go, yes, that'll do. That's close enough.

So, like on-the-land, the house of all, it's on-a-limb or on-a-land. And now I find out that there's a planet named that. So this was this happened on the second grand experiment, which is the one that's closest to us now. And that has the strongest, we have the greatest amount of events playing out in our timeline from that timeline.

And they did take out their leader. And then a series of things happened. And so the good guys the pro humans were winning. And then they were routed. And the population became confused after this leader was taken out through an assassination attempt.

So we would be playing that out this time. But because of all the work that we've done and all the, not just us, I mean, many different groups

are doing different things to help alter the timeline.

We're just doing our part. We're just seeing the consciousness grid.

So that this time, he wouldn't be taken out. There would be attempts to take him out. But they would not succeed this time. And so you hear in the news, now it's going around in the narrative assassination, assassination, assassination. So we're at that time, where that that event could play out. So they may try to do it, but they won't succeed.

Dr. Salla: Okay, so there we have the possibility of assassination attempts against, I guess, Donald Trump is probably the logical candidate for that. And if that was to succeed, that would probably trigger a civil war. But Trump is probably well protected.

And I mean, they've all but assassinated him politically and might even get to jail him and all of that. But the white hats are able to kind of like mitigate all of that sufficiently so that we're not going move into a civil war.

And presumably, we're going to emerge out of this with the United States being united. I mean, it's going to be unified. It's not going to break apart and continue to play a big role in the kind of future of the planet.

Jelaila: Correct. That's my understanding. And the assassination could take a different way. It could be a different leader that's assassinated, not the one in the United States. It could be an attempt on another one.

Dr. Salla: Right. Well, now one of the big kind of shifts in consciousness is people becoming much more aware of the elites, the dark hats, the cabal, whatever you want to call them, and child sacrifice and child trafficking. So what did the Nibiruans tell you about that?

Jelaila: Okay. Now, I'm not talking about the 5D Nibiruans, not the in Enlil and Enki. I'm talking about the ancient elders because they're the great historians, not Enki and Enlil. They're still alive. They're just a few years older, because remember, they live millions of years. To our 100 years, they have a 3600 year cycle around their sun. We have a 360. So they live by our standards, millions of years. So they're just a few years older than when they were here. So they aren't the great historians. It's the ancient Feline's in particular who are the great

historians, as I understand it. So I just lost my train of thought. What was your question again?

CHILD SACRIFICE AND CHILD TRAFFICKING

Dr. Salla: The exposure of the child sacrifice. I mean, yes. What they told you about that.

Jelaila: That will come out, but hopefully it will come out slowly so that the people can digest it a little at a time. But here's where we have to make our jump in consciousness in that. We have to realize that we also sacrifice other species. We also traffic other species.

Look what we do to animals. Do we traffic them? Do we sell them? Do we use them for rituals? So is one species better than another. Is it okay to do something to one, but not for another. I don't know.

But we have to look at what we have done as well. So when that information comes out, we have already seeded the grid with a template for people to also look inside and go, "What have I done to another species? Have I trafficked them? Have I sold an animal? Have I asked the animal if they wanted to be sold? Have I taken their babies away when they're first born and sold them? Have I used them for sacrifice?"

The other thing that we would have to do is look at how we treated ourselves, because from this higher perspective that these ancient elders taught me, they said, "Everything is a reflection of your own relationships, your relationship to the world is a relationship to yourself. So have you trafficked yourself? Have you trafficked yourself respect, your dignity, to appease somebody else or to get someone else's love or to get somebody else's approval?"

So there's always a mirror there. And if we can own all of that, just like we did at 9-11, we could own our part, like what did we do to cause them to want to take down our towers? We show that we have grown up in that way, because we can own our part. And then we take our power back, because we realize we're just as much of a perpetrator in our own way as they are with the stuff that they do to us. So although some of the stuff they do is pretty horrible, some of the stuff that we do skinning dogs alive and dropping them and boiling oil, how is that any

worse?

Dr. Salla: Yes, I agree with that. I think we are kind of like being given a mirror here in terms of how the other species deal with us, that like child sacrifice is a big deal now. And the kind of trade in adrenochrome and children is being highlighted. A lot of people are starting to put the light on that and the extraterrestrial element in that, the galactic slave trade and all of that.

But in the end, it's a mirror, because as you say, like, what do we do to the animals? What do we do to the kind of less intelligent species? I mean, It seems to be almost very, very similar.

Jelaila: And who is to say that they're not as intelligent as us, because just because we don't speak their language. So, and what do we do to each other? What do humans do to each other? So, we're saying, "Oh, well, we're the victims of this other species." But aren't we the perpetrators of evil with our own species?

Dr. Salla: Very true. Very true. I agree with that.

Jelaila: So that's all growing up. That's called owning your own part in something.

Dr. Salla: Yes. I remember something along those lines in terms of Mahatma Gandhi and India and how to achieve liberation from the British. He didn't embrace the idea that we need to fight the Brits and kind of like take advantage of their weakness during the First World War and rebel, because they're fighting, they're busy fighting the Germans.

Gandhi said, no, no, what they're doing to us is kind of like a reflection of what we do to one another. And we need to treat the untouchables better. We need to treat the disenfranchised better. And I think he had the right idea that this kind of oppression at a higher level is always a mirror of the oppression you conduct on others around you. So, I think this is a very important principle.

Jelaila: And what was the outcome? What was the outcome? Well, India, they won their freedom. They got their freedom. They were the only ones who got their freedom from the big Dragon, Great Britain, because they did it the right way. That's what we have to do now for the whole planet. That's what the message is from the ancient elders.

Dr. Salla: Yes. Yes. A non-violent way. It's very hard for people to

understand that non-violent way.

Jelaila: That's why we came and seeded the grid with the templates on how to do it the non-violent way.

Dr. Salla: Okay. Now, one of the things you mentioned in our chat before the interview was there was a plan to use 5G to kill a third of humanity. What were you told about that plan and is it still in the pipeline or has it been aborted?

Jelaila: It's not going to happen. The White Hats to have taken steps when they learned about it. It was through Huawei and the 5G towers that they were putting up that they had it at a frequency of 60 gigabytes, which at that level, it will disrupt the ability of the lung cells to take in oxygen and people would basically suffocate. So that has been stopped, because they did get these boxes that enabled them to put them on the 5G towers and modulate it down to 432 hertz, which is actually a healing frequency. So I'm not saying every 5G tower has one, but most of them have it.

FAKE ALIEN INVASION

Dr. Salla: Okay. Well, that's good to know that that is not going to happen now. So I wanted to look at this, a lot of rumors, a lot of chatter about the deep state having run out of all of its cards. It's tried everything it can to hold onto power and that the last card it's about the play is going to be some kind of false flag alien invasion or false flag crypto terrestrial invasion where all of a sudden you're going to have hundreds of thousands or millions of people being killed by fake aliens or pretend or something along those lines. So yes, have you been told anything about that? Any kind of insights there?

Jelaila: Yes, we did a template on that in 2005. It was a fake first contact template and we did a recording of that. It was at a workshop in Colorado Springs right there at the foot of NORAD. And we didn't know that going into that workshop, we thought it was just going to be galactic history. But all this other stuff came out about this timeline because you can open up a timeline and download the information just like you can open up your Akashic records and download your past lives.

So yes, there was going to be, and this happened on the last big grand experiment in the Pleiadian system, there was a group that came out of Andromeda, part of the old Orion Andromeda war.

They were an artificial intelligence created by the Reptilians eons ago to run their slave colonies in the Andromeda system. That's a whole part of the galactic history. And so they won. They were the only ones that won against the Reptilian masters or creators and so most of the AI groups had just gone back home. They had won their independence and they were happy, but there was a group of young ones. These were self-replicating AIs that were on it.

Their plan was to eliminate all organic species, then they could never be threatened again. So they met up with this human home world and it was right toward the end of that planet. And made a deal with them that they would be able to make that planet their home world.

And in return for helping one group there on that planet overthrow the existing rulers of the planet. And so they are the ones that would become their called the Android Andromeda Alliance. And they would become into Earth. They would look like humans.

And they would bring technology to help save the people from illnesses and diseases that would have occurred on the planet and that people would line up in droves for these for these aliens to help them.

And we were warned don't go with whoever shows as first contact. Run as far as you can away from them because their plan is not to help. Their plan is to enslave. So it would be the final card. If we can't enslave them any other way, then we'll trick them into it.

So that timeline event, it's not off the books yet, but it's not going to achieve its ultimate desire. They're just not going to be able to make it work. They weren't able to completely enslave the planet through the vaccine because not everybody took it. Enough people had woke up and they just wouldn't take it. So they're going to have to run through all their plans because remember they don't change that quickly.

They just have to keep using what they've got hoping that it works. If they can throw enough at it, it would eventually work, but it's not working because the people are waking up.

Dr. Salla: All right. So that's pretty dramatic. The founder races, the

Felines and the Carians are warning that the first alien species to reveal itself openly on Earth are likely or possibly going to be these kind of AI human looking beings that pretend to be our friends. But in fact, that they're going to trick us into accepting a situation where ultimately we'll be enslaved again.

Jelaila: Right. They will look angelic. They will look like us. They will be blonde-haired, blue-eyed, look just like us and we'll go, "Oh my God." [As if we are about to be saved.]

Dr. Salla: Well that is something that I'm sure a lot of people are going to find very disturbing. So how would you distinguish between an AI human looking alien being that really wants to trick us from a genuinely human looking extraterrestrial that is enlightened and benevolent and wants to assist us? How would you differentiate?

Jelaila: They have no soul.

Dr. Salla: So you would feel it from the first that you can't depend on them.

Jelaila: You can't depend on your brain. You got to feel your way. You got to feel your way. That's why for the last three decades, they've been talking about develop your ability to communicate with your higher self, develop your ability to communicate with your soul, with your guides, with your angels, whoever you want it to be, just develop that ability.

That's why they gave us DNA recoding to like recode DNA, reconnect 12 strands and through emotional clearing, an accelerated form of emotional clearing and to be able to achieve the level of consciousness, where you can make these templates yourself on every event that you've ever had and shift that energy.

And that all works together. And as you do that, that opens up your psychic ability. It's like it clears the static off the channel because all your fear, all your blocks are like static on the channel. And then when this time came, you could discern, because you can feel your way through these events. You can feel what's a psyop, what's not a psyop, but you can't think your way through, because it's such a masterful psyop. Your mind will trick you, but your heart will not.

Dr. Salla: I think that's very important. I mean, some might say, well, this is just developing emotional intelligence. I think that's part of it. I

think there's also a discernment level here. And I think we can feel that. We have the ability to do that.

I mean, I know when we began this interview, I said, when I looked at you in your eyes, I could see like a Feline being. I could see that. And I remember I was listening to an interview by a channeler and just kind of thinking, okay, this might be an interesting person for me to interview and just listening to this person.

And at a certain point, I could see in her eyes very clearly this gray, this gray alien. And it was like, wow, this was a very pretty popular young channel. And there's this gray alien behind her. It was like, wow, that was such a shock.

But I guess that's what you're saying that we have to develop that ability so we can discern who the impostors are from the genuine beings.

Jelaila: Right. And you have to be able to trust that, because if your brain will tell you one thing, and this is saying, oh, no, it's over here. It's not over there. And you've got to be able to trust this enough to follow it regardless of what this is saying.

Because for 30 years, I have been so far out there, I used to give myself daily sanity checks. Am I insane? Have I lost my mind?

Because I have given up everything for this, self-respect, my reputation as a business woman, my family, my ex-husband tried to have me committed.

All this took my kid away to follow this, but this kept proving itself over and over. And so I stuck with it. And so we all have that ability to see the Reptilians, they don't have this ability. We do. They can't feel what we feel. They can't create like we create. We are the poster children of creation.

And they can never get that. They can never achieve that even through a hybrid. They can never achieve that. Because this is what makes us the most awesome and yet, one of the most unpredictable and possibly deadly species in the galaxy.

We can create stuff and blow ourselves up or we can ascend. We can ascend ourselves. We can ascend through levels of consciousness because of these amazing abilities that we have.

FINAL THOUGHTS LOOKING FORWARD

Dr. Salla: Well, my final question, what lies ahead for us over the next six months or a year or two years? Where do you think we are heading as a planet?

Jelaila: I think we're at the end of this grand experiment. And you know why? You'll know that you're at the end because they said *"everything will be flipped upside down"*. Black will be white, men will be women, right will be wrong.

Everything will be the opposite. And it will just be absolutely insane. They said the day will come when people will literally be losing their minds in multiple ways, not just one way. And I think we're there. So I think we're just a few months away from this whole climax. And then there's going to be a lot of reeducation. It's going to be a slow process after that.

But you know, we'll create a new reality. That's going to be fantastic. *But it's going to be an ugly ride for the next few months.*

And it's going to get better. So we just all have to hang in there. We didn't make it twice. We blew up our planet twice, a nuclear just demise. We're getting it right this time. We just got to hang in there and just keep going one foot in front of the other.

It's hard right now. But it's better that it be hard than we just end it, because we got impatient or it was too hard, we didn't like suffering. We haven't suffered near what we would have suffered if we had stayed on the other timeline.

Dr. Salla: So where do people go, Jelaila, if they want to learn more about you, buy your books and any kind of upcoming conferences, workshops or events that you're hosting.

Jelaila: Okay, they can go to nibiruancouncil.com. And I do a weekly support call every Monday night at 7:30 CST called the [Compassion Creator Call](#) where we did all the templates for this last mission.

We've done them all, the blood in the streets, the child sacrifice, multiple templates to get through this period and all that's recorded. So then go back and look at the archives. Everything you just go to

the website, but they can join the calls for free. And I'm not doing any workshops right now. I have recorded workshops for guide communication and DNA recoding and that kind of thing.

But I'm just now coming back out and there was a reason I was supposed to come out. And you were obviously chosen as the vehicle. And I thank you for that. But that was to tell people that we're near the end here.

Hang in there. Don't give up. Maintain your hope. We just got to get through this ugly stuff because we have to show the people what they were going to experience. They had to have a taste of what their life was going to be like if we did not stop and take the planet back in a non-violent way. We cannot go into civil war. If we go into civil war, if we get routed into civil war, we lose. They will take it back.

Dr. Salla: Very important. Well, thank you, Jelaila, for sharing your amazing information. And I'm very glad that you've come back and you are now back in the fold and giving us whatever new insights you're getting from the founder races. And I look forward to future interviews and learning more about what's going on from the perspective of the founders. So thank you.

Jelaila: You are so welcome. Take care.
